INTERACTIVE MEDIA & WEB TECHNOLOGIES · SEEKING LIA INTERNSHIP 2026

ABOUT

I'm a driven and passionate student at Linnaeus University in Växjö, studying Interactive Media and Web Technologies. I combine design and code — from Figma prototype to finished, responsive product. 3D is where I feel most at home: I model, shade and animate in Blender, and bring those skills into the web through Three.js.

I'm deeply passionate about new technology, especially the rapid development of AI and the possibilities it opens up for designers and developers. I actively follow the AI space and believe that embracing these tools is key to working smarter, building better products and staying ahead in a fast-moving field. I'm a quick learner who thrives when exploring new ideas — and I'm always looking for ways to push what's possible.

EXPERIENCE

Store Employee Nov 2020 – Summer 2024

ICA Malmborgs Erikslust · Malmö

Grocery, frozen foods, dairy & meat departments. Customer-facing role in a high-traffic store. Strong communication and teamwork in a fast-paced environment.

AI Art & E-commerce 2023 – 2024

Self-employed · Etsy

Early adopter of AI image generation — created custom AI-generated artwork and applied it to mousepads and merchandise, which I sold through my own Etsy store. Combined prompt engineering, product design and e-commerce independently.

Garbage Bin Washing Summer (own business)

Self-employed

Ran my own summer job — planned, marketed and executed independently.

Internship — Kindergarten During school

School placement

Working with children in a kindergarten environment.

Internship — Leos Lekland During school

Leos Lekland (children's play centre)

Customer service and supervision at a children's play centre.

EDUCATION

Interactive Media & Web Technologies

Linnaeus University · Växjö

2024 – Present · Bachelor program
